# Belobrov Ilya

React native developer

Hello there, I'm a 21 y.o developer with ability to solve challenging tasks on my own.

Being mostly focused on React native I'm also gaining expertise in Javascript, React-around infrastructure and looking forward to find my craft as an engineer of performant client applications overall

Looking for a full-time job at office in Kharkiv or a remote position

Ukraine, Kharkiv

Technologies:

Typescript, react, react native, nativeCLI, expoCLI, native modules, notifee, REST-API, background-actions, redux-toolkit, redux-persist, git, shopify/flash-list, asyncThunk, reactDevTools , HTML/CSS,

Languages: English(B2), Russian, Ukrainian

Education: Bachelor in computer integrated technologies
Kharkiv Politechnical Institute, 2019-2023
Applied to the fifth year in order to get Master's degree, 2023-2024

Experience:

Created an application that led to increased income of short-time investments. Based on RESTful Open API with hash-managed authorization (SSH) it provides a safe way to automatize daily search of profitable offers according to configuration by relying it on a service that works in background. Instant push-notifications reduce possibility of losing a deal because of hesitation while performant logic and adaptive UI allows to run application on devices with different screens and hardware starting from android 5.0.

Feel free to install it from GitHub or see additional description and previews
